Program requirements

Semester and year change(s) take effect: Fall 2022

Appropriate computer abbreviation if

course title is more than 30 spaces: Intro to Coding in the Hum

Briefly summarize the change requested:

I'd like to add WRIT 20883 (Intro to Coding in the Humanities) to the list of courses Digital Culture and Data Analytics minors can take to satisfy the program's coding requirement (Core Requirement, Category 2). Students who satisfy the coding requirement with GEOG 30323 or COSC 10603 can instead count WRIT 20833 as an elective for the minor.

1. What is the justification for the change(s) requested?

The DCDA minor now boasts over 100 enrolled students. We need to add another coding course to minimize pressure on any single course or department supporting the program. We need a “backup plan” should faculty teaching the other coding courses not offer the course in a given semester (due to sabbatical or family leave, for example).

2. If applicable, explain how the change(s) will affect the current program outcomes and assessment mechanisms.

The addition of this course to the program will not affect outcomes or assessment. The course will be assessed according to the current outcomes attached the program.

3. **Faculty Resources:** How will the unit provide faculty support for this change and any other impact this change may have on other current departmental listings.

In addition to satisfying the coding requirement for the DCDA minor, WRIT 20833 will also satisfy the "Design and Editing" requirement for the Writing major. As such, it is a course the English department can justify offering one or more times a year.

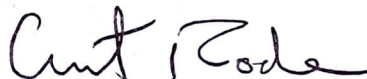

4. **Educational Resources:** Will this change require additional resources not currently available (e.g. space, equipment, library, other)? ☐ YES
If yes, list additional resources needed. ☒ NO

5. If this change affects other units of the University, include a statement signed by the chairperson(s) of the affected unit(s).
