Subject: RE: Program proposals

Dear Greg,

I support such a change.

Best regards!

Yuri

Subject: Program proposals

Hi Yuri,

As you know, Math and Actuarial Science majors can satisfy associated requirements by taking PHYS 20474 and/or PHYS 20484. I'm working on some program change proposals that would also allow PHYS 20475 and/or PHYS 20485 to count for this. This will likely only effect students who are Math-Physics double majors, but there are some of those, so I think it's worth putting in the catalog rather than having to give it special approval every time. I've attached the proposals, which are identical except for the program names and codes. Would you please send me a letter confirming that you support such a change that I can include with the submission to the curriculum committees?

Thanks,
Greg
